DETAILED ACTION

Claim Objections

Claims 1 and 8 are objected to because of the following informalities: In line 2 of claim 8, it recites "a". However the next character immediately after "a", on the next line is also an "a". Claims 1 and 8 recite, "drain". These appear to be typographical errors. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the limitation "said output shaft" in line 8. There is improper antecedent basis for this limitation in the claim. Claim 26 recites similar language in line 10, where it recites "said output shaft".

Claims 22 and 26 recite "said output shaft". Since both claims recite a first and second output shaft it is unclear which output shaft the Applicant is referring to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3712

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 22 is rejected under 35 U.S.C. 102(e) as being anticipated by An.

An discloses an animation device comprising a first motor (41) coupled to a first gear train having a first (42) and second output shaft (43); said output shafts (42,43) configured perpendicular to each other; a left cam (44) radially connected to a left end of said first output shaft (43), said left cam (44) driving a left follower to induce motion in a left arm assembly (40); a right cam (44) radially connected to a right end of said first output shaft (43), said right cam (44) driving a right follower to induce motion in a right arm assembly (40); a middle cam (38) radially connected to said output shaft (37), said middle cam (38) driving a middle follower (38a) to induce motion in a midbody perimeter hoop (20).

Allowable Subject Matter

Claims 1-21 are allowed.

Claims 23-28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
